ABOUT ME I like building solutions to real problems with clean, concise code. I am always learning new technologies and never afraid to dive into something unknown. My experience in sales has given me excellent communication skills. I want to build meaningful applications as a key contributor to an engineering team. Eventually I would like to lead a team of developers.

TOP SKILLS Ruby, Rails, JavaScript, NodeJS, AngularJS, ReactJS, AWS

EXPERIENCE **EKO DEVICES** Aug. '15 - Jul. '16
SOFTWARE DEVELOPER Berkeley, CA

- Built and tested new features on both a Rails-based API and AngularJS app.
- Implemented feature allowing users to live-stream heart sounds from a digital stethoscope to a web browser. Powered by NodeJS and websockets.
- Generated dynamic SQL queries allowing users to search for records.
- Deployed features to production with Amazon Web Services.

JG BLACKBOOK Sept. '12 - Oct. '14
SALES MANAGER New York, NY

- Scheduled and executed sales presentations in all major US cities.
- Cultivated relationships within the luxury travel management community.
- Coordinated with clients to ensure strategies were implemented.

LAIDLAW & COMPANY 2011
EQUITY, SALES, VENTURE CAPITAL New York, NY

Built spreadsheet functions to calculate options strategies, earnings performance, fundamental strength tests, and technical analysis using Bloomberg Add-In.

PROJECTS **DRUM SEQUENCER** [Demo](#) | [GitHub](#)
JAVASCRIPT, WEBAUDIO API

A programmable drum sequencer built using JavaScript's Web Audio API; a powerful system for generating, controlling, and manipulating audio.

EDUCATION **FORDHAM UNIVERSITY** Class of 2011
BA BUSINESS ADMINISTRATION New York, NY

DEV BOOTCAMP Nov. '14 - Apr. '15
WEB DEVELOPMENT San Francisco, CA
