

EDUCATION

Dev Bootcamp

Web Development 2015

Fordham University

Bachelor of Science (BS) Business Administration
2011

SUMMARY

I am a former sales manager turned computer programmer. All my life I have always been curious as to the way things work. Now that computers and software have become such an integral part of society, I decided to learn to program. After recognizing the sheer magnitude of available technologies, I was eager to dive right in. I am always pushing myself to learn something new everyday. I have always been a people-person; good communication comes naturally to me. Additionally, my 2+ years in professional sales have made me very easy to work with whether it be in a pair or a large group of people. I am looking forward to working and growing with a team of like-minded people.

SKILLS

Ruby, Ruby on Rails, JavaScript, jQuery, AJAX, HTML5, CSS, Heroku, PostgreSQL, SQLite3, Rspec, Test-Driven Development, Agile Development, Photoshop, Illustrator, Ableton Live

EXPERIENCE

DEV BOOTCAMP

Recent Graduate

2014 to 2015

Dev Bootcamp is a 19-week intensive training program for aspiring web developers, specializing in Ruby, Rails, HTML5, CSS, Test Driven Development, Object-Oriented Javascript (AJAX, JQuery), Git, Heroku, and Agile Development. I graduated from the program in April 2015. The first 9 weeks of the curriculum are remote, while the second 9 weeks are an immersive in-class experience. The program also addresses intra- and interpersonal strategies to foster optimal learning and teamwork environments.

JG BLACK BOOK

Sales Manager

2012 to 2014

Managed portfolio of eight clients. Conducted sales calls in major US cities: New York City, Greater New York Area, Los Angeles, San Francisco, Texas, Chicago, Atlanta, and Miami. Cultivated relationships within the luxury travel management community. Worked with travel management companies to ensure strategies are communicated and implemented.

LAIDLAW & COMPANY

Equity Research, Sales and Venture Capital

2011

Constructed detailed analysis reports on multiple companies per day. Built spreadsheet functions to calculate options strategies, earnings performance, fundamental strength tests, and technical analysis using Bloomberg Add-In.

PROJECTS

DRUMMERSCRIPT

DrummerScript is a programmable drum sequencer built using JavaScript's Web Audio API; a powerful system for generating, controlling, and manipulating all types of audio right in your web browser. This project was a fun way to incorporate my passion for music production with my abilities in JavaScript. Technologies Used: Object Oriented JavaScript, jQuery, AJAX, Handle Bars and the Web Audio API.

CONTEMPORARY HOMES (WORK IN PROGRESS)

This is an app I am building for a real estate broker. The app will be used to showcase home listings and photos to potential buyers. The broker will also be able to log in as an admin to add, remove, or edit existing listings. Technologies Used: Ruby, Rails, JavaScript, CarrierWave, Amazon S3, Google Maps API, Heroku.

WHERE'S MY MONEY

Where's My Money aims to make it easier for all of us to access unclaimed property that's rightfully ours by searching multiple government databases and assisting in the claims process. Technologies Used: Ruby on Rails, Redis, Resque, Rackspace, Nokogiri, HTTParty, Mandrill, Google Contacts API, D3 Datamaps.
